

Assignment-2

Instructions:

1. Provide important references.
2. Run your code on both Linux and Windows, and demonstrate it.
3. Use a Makefile, a debugger (e.g., GDB), and Valgrind.
4. Structure your files as follows:
 - Header file: .hpp
 - Implementation file: .cpp
 - Main program/application file: .cpp
5. Provide a one-page write-up about your topic.
6. Write a blog post on this topic.
7. Present your project before the class; alternatively, a video can be shown.

Last Date of Submission: October 20, 2024
